

*LCDR Harold W. Hannah
Communications Officer*

COMMUNICATIONS DEPARTMENT

Anyone who passes by the divisions in the Communications Department will undoubtedly see them in **motion**. The men of Communications work around the clock performing duties vital to the operation of *Enterprise*

The department is comprised of the Signal Bridge, Message Processing Center, Radio Technical Control, Teletype Repair and Remote Transceiver workcenters, employ 73 radiomen and signalmen, a yeoman, a chief, senior chief and master chief petty officers and five officers.

The Communications Department performs its job continuously with the latest state-of-the-art equipment, to a form of communications that dates back to the age of sailing ships.

Radiomen and signalmen work hard under pressure to accomplish their mission aboard *Enterprise*. On those rare occasions when the work is slow, they perform drills to keep themselves proficient. These communications specialists are extremely proud of the work they do and are dedicated to helping *Enterprise* perform at its best.

The ability to communicate, whether by flashing light or satellite transmissions, is vital to the success of *Enterprise's* mission. It is no doubt that we are truly the "voice" of *Enterprise*.
